2. For the purpose of implementing paragraph 1, the territories of the Tripartite Member States shall be considered as being one territory. Originating products made up of

materials wholly obtained or sufficiently worked or processed in two or more Tripartite Member States shall be considered as products originating in the Tripartite Member States where the last working or processing took place, provided the working or processing carried out there goes beyond that referred to in Article 7 of this Annex.

 - (b) the value of the originating materials used in the production of the good is at least equal to 30% of the ex-works price of the good.

2. Notwithstanding paragraphs 1 above, for the purposes of this Annex, products which are not wholly obtained in a member state and contained in the list in Appendix I are considered to be sufficiently worked or processed only when the conditions set out in the list are fulfilled. Those conditions indicate, for all products covered by the list, the change of tariff classification or working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials.

Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out above is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.
